3RD TURKEY - AFRICA DEFENCE SECURITY AND AEROSPACE FORUM

“Security Institutions of Future and Cooperation for Strategic Transformation After Covid-19”

(05-06 November 2020, Istanbul)

The geopolitical panorama created by the similarities of African countries as well as their differences provides crucial data both for their integration and for their potential for conflict. Both intra-continental and international defence and security strategies need to be determined in a way that does not exploit these qualities of Africa and that primarily treats them as gains in favor of the continent.

Africa comprehensive international military strategies which are feeding the concern that regional security crises on the Continent need to be taken into account. There are views that Africa's inability to properly strengthen its military capacity due to the current problems both in industry in narrow scope and in defence industry in general, provides groundwork for extreme “intrusive” and New “colonialist” tendencies.

It is understood that the concept of “terror” will continue to be used as a “pressure factor of systematic manipulation tool of competing states.” Policies that prioritize “structural compatibility” towards development and security issues, which are also the main causes of the migration problem, can be considered to have the opposite effect and to feed the political and economic crises. Socioeconomic transformation is not independent of security; neither is it independent of science, technology and innovation. In the field of defense, security, it and space exploration, Turkey has a high potential for new strategic projects that are compatible with the Continent's future vision and will contribute to mutual capacity development.

The Covid-19 outbreak has been a critical milestone for the change of production, consumption, growth and conventional power standards, including security and defense. Again, scenarios and preparations for national and international reinterpretation of the immune system and strategic transformation have become a top priority. In this context, “Security Institutions of the Future and Strategic Transformation” for the work to be done and cooperation for each country has become a locomotive priority.

In the relations that have reached the "strategic partnership" stage, it is important for Turkey to observe the activities of actors such as the USA and EU, especially China, in the continent with sensitivity and to develop its strategic policies with an open reflex to multilateral negotiations. The third of Turkey - Africa Defence Security and Aerospace Forum, where representatives from the defence, security, space sectors and institutions of Turkey and African countries will come together, will be held simultaneously with the Istanbul Security Conference which has been institutionalized as a global brand. The Forum; will continue to contribute strategically to mutual capacity building and strategic cooperation, respond to inventory and ecosystem needs by strengthening its institutionalization.

Sub-Themes | Cooperation Areas

Military and Institutional Governance of the Future After Covid-19

Land | Sea | Air | Space

Future Homeland Security Governance and Coordination After Covid-19

Civil Adm. | Law Enforcement | Local Governments

Future Police and Institutional Governance
